Filing Receipt Corrections

Dear Sir:

Applicant respectfully notes that the Filing Receipt, mailed on April 18, 2007, see Exhibit 1, for the above-identified patent application contains a material error; which Applicant hereby respectfully requests to be corrected. Applicant also notes that this same error also appeared on the Notice of Acceptance of Application Under 35 U.S.C 371 and 37 CFR 1.495, see Exhibit 2; as well as on the U.S. Patent Application Publication No. US 2006/0140986 A1 dated June 29, 2006, see Exhibit 3; first page only presented here.

Applicant notes that the material error is in the PCT filing date for the International Application Number, PCT/EP2004/050967 for this 371 application, see Exhibit 4; first page only presented here. In the attached documents, Exhibits 1, 2, and 3, the filing date of this PCT application was erroneously printed as July 1, 2004, whereas the correct filing date is June 1, 2004. The typographical error in the month of filing incorrectly suggests that the PCT application did not and could not properly claim priority from the earlier filing of the foreign priority application in June of 2003.

In more specifics, Applicant respectfully directs the Office to the Filing Receipt currently in issue, where under the Domestic Priority Data as claimed by Applicant, the filing date was errantly printed 07/01/2004, not the appropriate 06/01/2004. Again, in more specifics, the identical error was also shown on the Notice of Acceptance of Application under 35 U.S.C 371 and 37 CFR 1.495, on which it incorrectly printed 07/01/2004 under the heading for "I.A. FILING DATE". Copies of the Filing Receipt and the Notice with corrections hand-noted thereon are attached, See Exhibits 1 and 2.

Applicant notes moreover that he duly filed a Petition for Republication of a Corrected Patent Application on August 25, 2006, See Exhibit 5. In the Petition, Applicant respectfully noted that the PCT application was timely filed on June 1, 2004; and subsequently requested republication with the correction of the material error. Applicant is now requesting correction of this typographical error in an updated Filing Receipt as well as throughout the application file wrapper.

Applicant respectfully submits that no fee is due with this request.

FILING RECEIPT

Date Mailed: 04/18/2007

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to

espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

ABSTRACT

It comprises a mixture of lidocaine, prilocaine and tetracaine, or their pharmaceutically acceptable salts. The preferred composition comprises the following components in the indicated approximate w/w percentages: 1.5% of lidocaine base; 1.5% of prilocaine base; 4% of tetracaine base; 10% of methylpyrrolidone; 2% of dimethyl sulfoxide; 0.08% of topical hyaluronidase; 1.5% of guar gum; 1% of Tween-20; 0.5% of Tween-80, and the necessary amount of water to 100%. It exhibits a high concentration on skin, a deep anesthetic effect and a significantly more rapid onset of the anesthetic effect than comparable transdermal anesthetics.

Dear Sir:

The above-referenced patent application was published on June 29, 2006 and contains a material mistake made by the U.S. Patent and Trademark Office, which is apparent from the Office records. The application contains a material mistake in the international filing date (or "PCT Filed" date) on the front page of the application. The correct international filing date (or "PCT Filed" date) is "June 1, 2004," not "July 1, 2004," as mistakenly shown on the front page of the application.

The materiality of this mistake lies in the relation of the international filing date (or "PCT Filed" date) to the priority date, whereby the errantly-published PCT Filed date of July 1, 2004, suggests that the PCT application was filed later than necessary to obtain priority, and thus presents the appearance that the PCT application did not appropriately claim priority from the earlier filing in June of 2003. This is indeed not the case because the PCT application was timely filed on June 1, 2004, and correctly claimed priority to the earlier case. Applicant also submits herewith supporting documents showing: 1) the relevant page of the original filing documents clearly showing the correct

International PCT filing date (i.e. June 1, 2004); and ii) the front page of the published application showing the incorrect international filing date (i.e. July 1, 2004).

Applicant is submitting this petition within the required two months of publication of the above-referenced application and respectfully requests republication of the above-referenced application to correct the material mistake pursuant to 37 CFR § 1.221(b). Applicant believes no fees or petitions are due with this filing. However, should any such fees or petitions be required, please consider this a request therefore and authorization to charge Deposit Account No. 50-3199 as necessary.
